### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The amendment to the claims filed on June 29, 2005 has been entered and prosecution of claim 17 continues. Claims 11, 12 and 21 are not considered to be free of the prior art of record.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Qi in view of Baileys.

Qi discloses dry edible oil and starch composition containing omega fatty acids and up to 15% cyclodextrin (see abstract). At column 5, lines 31-50, the manufacture of cyclodextrin, using the enzyme of claim 2 is described. The use of the omega fatty acids in the composition to lower cholesterol is described at column 1, lines 15-26. Lecithin is used in the product and is a known emulsifier. Corn syrup solids are also employed and these corn syrup solids would likely act to hydrate the cyclodextrin. The oil in the product may derive from any of a number of sources that include a grain or plant source (column 3, lines 22-30). The concept of freezing drying the mixture of fat and cyclodextrin is shown at column 8,

lines 23-25. The claims appear to differ from Qi in the recitation of the use of a reduced trans fat. Swern is relied upon for evidence that natural fats, like the fats in Qi, do not contain trans fats. Thus it would have been obvious to one of ordinary skill in the art to expect that the fat of Qi provided a source of low trans fat to the Qi emulsion.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carolyn A Paden whose telephone number is (571) 272-1403. The examiner can normally be reached on Monday to Friday from 7 am to 3:30 pm.
